S. Comments:Rider q'd re poor performance-stated that the horse raced in a forward position as expected however never felt comfortable with the shifty track conditions. Added that over the final stages of the event, whilst pulling up, the horse made an abnormal respiratory noise. Trainer q'd: stated that on return to scale that the gelding had removed its tongue from its tongue tie after leaving the enclosure. Stated that the gelding performs best with its tongue tie and in his opinion is an essential part of the gear. Added-he would add a tongue control bit to the horses gear for its next start.

He said that not long after, the horse dropped the bit and became detached from the main body of the field. He added that on straightening he was concerned there was something amiss with the colt and for this reason he did not persist in riding it out. He added that not long after the post the horse made an abnormal breathing noise. Trainer reported the horse was found to have slight bruising to its off front heel.

S. Comments:When questioned as to the tactics adopted, App. A Hearn stated that at its last start the mare found the lead in a small field of its own accord without being pressured. App. Hearn added that it was not his intention to have the horse lead on that occasion as the mare's usual pattern of racing is to settle in the second half of the field. He stated that the same instructions were issued today which from a wide alley he was able to comply with resulting in the mare settling towards the rear of the field. Stewards noted the explanation.
