AVG DISTANCE FROM RAIL PER SECTION

### HOW TO READ THIS PAGE

Speed tops out where the horse was quickest. • Stride Length = ground gained per bound. •  
 Stride Rate = how quickly the legs turn over. • Speed = Stride Length x Stride Rate. •  
 Distance from Rail = metres off the fence each section; a lower, tighter line saves ground. •  
 ----- Field average — above the dashed line = faster than the field, below = slower.

AVG DISTANCE FROM RAIL PER SECTION

### HOW TO READ THIS PAGE

Speed tops out where the horse was quickest. • Stride Length = ground gained per bound. • Stride Rate = how quickly the legs turn over. • Speed = Stride Length x Stride Rate. • Distance from Rail = metres off the fence each section; a lower, tighter line saves ground. • --- Field average — above the dashed line = faster than the field, below = slower.

AVG DISTANCE FROM RAIL PER SECTION

### HOW TO READ THIS PAGE

**Speed** tops out where the horse was quickest. • **Stride Length** = ground gained per bound. • **Stride Rate** = how quickly the legs turn over. • **Speed** = Stride Length x Stride Rate. • **Distance from Rail** = metres off the fence each section; a lower, tighter line saves ground. • **Field average** — above the dashed line = faster than the field, below = slower.

### HOW TO READ THIS PAGE

Speed tops out where the horse was quickest. • Stride Length = ground gained per bound. •  
 Stride Rate = how quickly the legs turn over. • Speed = Stride Length x Stride Rate. •  
 Distance from Rail = metres off the fence each section; a lower, tighter line saves ground. •  
 ----- Field average — above the dashed line = faster than the field, below = slower.
