Distance from Rail

AVG DISTANCE FROM RAIL PER SECTION

HOW TO READ THIS PAGE

Speed tops out where the horse was quickest. • Stride Length = ground gained per bound. •
Stride Rate = how quickly the legs turn over. • Speed = Stride Length x Stride Rate. •
Distance from Rail = metres off the fence each section; a lower, tighter line saves ground. •
----- Field average — above the dashed line = faster than the field, below = slower.
